

NEERAJ KUMAR

DATA ANALYST | BUSINESS INTELLIGENCE

India | Excel | SQL | Power BI | Python

PORTFOLIO PROFILE

PROFESSIONAL PROFILE

Detail-focused data analyst with hands-on skills in data cleaning, preparation, transformation, exploratory analysis, KPI reporting, and dashboard development. Uses Excel, SQL, Power BI, and Python to turn structured data into clear business insights and practical reporting views.

SELECTED PROJECTS

E-commerce Sales Analysis

POWER BI / SQL / EXCEL

Designed a sales analysis workflow covering revenue, orders, profit, category, product, region, and monthly trends. Prepared an interactive KPI view to support faster performance review.

Employee Attendance Dashboard

POWER BI / EXCEL

Transformed attendance records into a dashboard for presence, leave, work-from-home, date trends, and team comparison. Focused on clear exception tracking and operational visibility.

HR Analytics Dashboard

POWER BI / SQL

Built a workforce analysis concept covering headcount, attrition, departments, roles, demographics, and tenure. Organized the report for executive summary and segment-level investigation.

ANALYTICS WORKFLOW

1. Define the business question and required KPIs
2. Clean, transform, and validate source data
3. Explore trends, segments, and exceptions
4. Visualize findings and explain the business impact
